VOE/I Cascade Experience

Our VOE/I “waterfall experience” casts an even wider net when validating employment and income, making the process much more efficient for you. Here’s how it works:

Automated Verification

Check employment and income more comprehensively through Xactus’ direct integrations with:

- **Experian Verify™:** A validation resource powered by the most current data available and delivers employment and income verification data directly from trusted payroll sources in real time.
- **The Work Number®:** A solution offered through Equifax Workforce Solutions*, and the largest collection of payroll records contributed directly by employers.

Plus, the workflow is fully customizable and can be programmed to cascade, meaning if the data isn’t available in one instant database, another one can be checked.

Manual Verification

If an applicant’s employment or income information isn’t available in our online databases, there’s no need to worry – we offer a complete solution and can perform a manual verification.

Our team follows a uniform, auditable process that ensures you get data you can trust.
